DesktopCentral 7

A One-Stop Solution For All Your Desktop Management Needs

Starts at
$995

The Challenge

Desktop Management is a never-ending job for administrators. Configuration requests ranging from simple drive mapping to software installation keep the administrators on their toes. With increasing requests and a growth in the number of desktops, it becomes more difficult to keep up with escalating demand on limited manpower.

The Solution

Desktop Central is a complete Windows Desktop Management solution that provides Software Deployment, Patch Management, Asset Management, Remote Desktop Sharing, Service Pack Deployment, Configurations, Active Directory Reports, User Logon Reports and Windows System Tools.

With its network-neutral architecture, the administrator can easily manage Active Directory, Workgroup, and Novell eDirectory based Windows networks. The desktops being managed can be in the LAN or distributed across WAN.

Use Desktop Central to

✔ Automate Regular Desktop Management Activities

✔ Standardize configurations of OS and Application Across th Network

✔ Secure Desktops from Wide Range of Threats

✔ Troubleshoot day-to-day Problems

✔ Audit your IT Assets

Automate • Standardize • Secure • Trouble shoot • Audit — Desktop Central
